EBERHARDT BLUEBERRY NURSERIES

(Since 1924)
"Oldest and Largest in the West"

Phone 9455 Route 1, Box 382
OLYMPIA, WASHINGTON

Take highway 101 (West) out of Olympia. Five miles out road forks. Keep to right on 101 for about 2 miles. Turn right at "Schneiders Prairie" on "Hunter's Point Road." Stay on blacktop for about 2 miles. Red-roofed house on right hand side of road.

We are growers of blueberries as well as blueberry plants, and offer only such plant stock as consistently in the past has borne good crops for us.

This price list cancels all previous quotations. Prices are subject to change without notice.

To Our Customers

We are rapidly eliminating the older varieties such as Grover, Rubel, Harding, Pioneer, Adams, Katharine, and Cabot, and are replanting our fields with the standard, and up-to-date newer varieties which you will find listed herein.

Since the newer varieties are so much superior in size, flavor and productiveness to the above-mentioned older varieties, they are being planted extensively by us as well as the more progressive growers.

When purchasing blueberry plants select for size and quality, as age is often deceiving when stock has been grown in poor soil.

Our customers may be assured that our blueberry stock is of the proper size corresponding to the age represented.

Description of Leading NAMED VARIETIES

Please Note—All nursery stock is pruned before leaving nursery and no pruning is necessary until after plants have borne a crop.

STANDARD VARIETIES EXTENSIVELY GROWN

RANCOCAS — One of the best commercial varieties. Berries medium large, of good flavor, ripening in early July. Excellent shipping and freezing qualities as well as for table use. Very dependable cropper, and entire crop can be harvested in two pickings.

Bush — Sturdy grower and very easily pruned. At maturity, bush should reach height of 6 feet.

Large — 2-year nursery grown, 12 to 18 inches tall, before pruning, each70

Large — 3-year field grown, about 20 inches tall, heavily rooted, each90

Large — 4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each\$1.50

CONCORD — Berries large and of good flavor but somewhat acid unless allowed to hang on bush until fully ripened. A good early mid-season variety. An erect and tall grower. Pruning consists of eliminating the dense twiggy growth from center of bush. Ripens early July.

Large — 2-year, 12 to 18 inches tall before pruning, each70

Large — 3-year field grown about 20 inches tall heavy rooted, each90

Large — 4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each\$2.00

STANLEY — Berries firm, medium large and of excellent flavor, ripening from middle of July into August. Good for both shipping and home use. Bush is tall, reaching a height of 7 feet at maturity. Foliage is very ornamental.

Large — 2-year nursery grown, 12 to 18 inches tall before pruning, each70

Large — 3-year field grown, about 20 inches tall, heavy rooted, each90

Large — 4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each\$2.50

Promising New

It is our aim in introducing the following three new "Eberhardt" hybrids to please the blueberry growers as well as the consumer.

PACIFIC "EBERHARDT HYBRID" — Formerly known in our records as "D-4". One of our most ornamental bushes, producing a gorgeous array of fall coloring. The Pacific is a very vigorous bush yielding berries of unusually large size and good flavor, which are of excellent quality for table use as well as freezing and canning. Clusters ripen evenly and berries run remarkably large in size throughout the harvest. Of all the varieties the berries of the Pacific are the most easily picked. Ripening season, early July.

2-Year Nursery Grown—Again Available, Fall 1948

3-Year Field Grown—Again Available, Fall 1948

4-Year Heavy Field Grown—Each\$3.00

5-Year Heavy Field Grown—Each\$4.00

WASHINGTON—"EBERHARDT HYBRID"—Formerly known in our records as "N-1410". We firmly believe that this is the best shipping berry yet produced. It is also outstanding for both canning and freezing. This berry is large in size and at first slightly sub-acid but when fully ripened is deliciously sweet. The Washington has inherited the best qualities of both its parents (Pioneer) X (Rubel) in a superlative degree and no variety yet known to us excels it as a berry suited to all needs. Ripening season late July and August.

2-Year Nursery Grown—Again Available, Fall 1948

3-Year Field Grown—Again Available, Fall 1948

OLYMPIA—"EBERHARDT HYBRID" — Formerly known in our records as "B-322". Bush tall and broad. Berries somewhat larger than Atlantic or Pemberton, of good flavor and excellent shipping quality. Ripens early July.

2-Year Nursery Grown—Again Available, Fall 1948

ATLANTIC—"COVILLE HYBRID" — Bush stocky but somewhat spreading. Berries very large, and of good dessert qualities, ripening late July.

2-Year Nursery Grown—Again Available, Fall 1948

New Varieties

"N-51-G"—New Hybrid (Pioneer) X (Jersey)—A sturdy upright growing bush. This berry is of good quality and in size is one of the largest. It is a very popular variety with us. Ripening season, mid-July.

Limited Stock

2-Year Nursery Grown—Each	\$1.50
3-Year Nursery Grown—Each	\$2.25
4-Year Field Grown—Each	\$3.00
5-Year Field Grown—Each	\$4.00

DIXI—Bears very large berries of good flavor and quality, ripening mid-August. Bush tall, reaching a height of about 7 feet at maturity.

2-Year Nursery Grown—Again Available, Fall 1948

WEYMOUTH—Earliest of all varieties. Ripening season about the middle of June. Bush of medium height and bears large, dark blue, berries. Fair flavor and keeping qualities.

Limited Stock

2-Year Nursery Grown—Each	\$2.00
3-Year Nursery Grown—Each	\$3.00

PEMBERTON — "COLVILLE" HYBRID — Vigorous and very productive bush. Berries surpass Rubel in both size and flavor and ripen earlier. The Pemberton is a very promising new variety.

2-Year Nursery Grown—Each	\$1.00
3-Year Field Grown—Each	\$1.75
4-Year Field Grown—Each	\$2.50

BURLINGTON—Latest of all cultivated varieties. Medium large berry, firm, and of good flavor. Bush is very vigorous and also one of the tallest, reaching a height of about 8 feet at maturity. Ripening season, mid-August 'till late September.

2-Year Nursery Grown—Each	\$1.00
3-Year Field Grown—Each	\$1.75
4-Year Field Grown—Each	\$2.50

We have a limited number of 1-year plants in the following new varieties:

PEMBERTON — Each70
BURLINGTON — Each70

JERSEY—The best late variety. Berries are large, of good flavor and stand up well in long distance shipping. Ripening season from early August into September. Bush exceptionally tall and vigorous grower and easily pruned.

Large — 2-year nursery grown, 12 to 18 inches tall before pruning—Each70

Large — 3-year field grown, about 20 inches tall, heavy rooted—Each90

Large — 4-year field grown, about 2½ feet tall, extra heavy rooted and well set with fruit buds for the coming season, each\$2.00

1 YEAR PLANTS

Some 1-year Jersey, Concord and Rancocas available. 10 plants for\$5.00

Sold in bundles of not less than 10 of either variety, per 100\$45.00

To Home Gardeners and Commercial
Growers Wishing Quick Returns We
Offer the Following Varieties in

“Giant-Sized” Plants

RANCOCAS—Large 5-year field grown\$2.50

RANCOCAS—Large 6-year field grown\$3.75

JERSEY—Large 5-year field grown\$3.00

JERSEY—Large 6-year field grown\$4.00

STANLEY—Large 5-year field grown\$3.00

These plants are from 3 to 5 feet tall before pruning and have from 3 to 8 strong stems (depending on the variety), plus a heavy matted root system. All of them had a good crop of berries this past summer and are well set with fruit buds for the coming season. All plants will be properly pruned (ready for planting) before leaving the nursery. These Giant sized plants should bring quick returns to the commercial grower or would be ideal in the home garden.

CUTTING WOOD

RANCOCAS and **JERSEY**—Whips about 14 in. long, 10 whips per bundle. (Not less than 10 whips per bundle of one variety.)
Per bundle\$1.00

EBERHARDT HYBRID BLUEBERRY PLANTS

Again This Season We Can Offer Our Outstanding "Hybrid" Blueberry Plants

These plants are Hybrid crosses, the progeny of high quality parents, such as D-4 X Atlantic, N-1410 X Jersey, B-322 X Pemberton and others.

All have borne the past two seasons a good crop of large luscious berries and we are of the honest opinion that they far excell any hybrids we have been able to offer up to 1948.

They have from 3 to 5 stems before pruning, and range from 2½ feet to 5 feet in height, are heavy rooted, sturdy and well branched plants with ample fruit buds to warrant a fair crop of berries this coming season. Ripening season for these berries is from early July into September. These hybrids are sent out under one common label, "Hybrids."

NO POLLENIZER NECESSARY

These jumbo sized plants are ideal for field planting; can be used for hedge planting or in the home garden, as they produce both delicious berries and a riot of fall coloring.

The moderate prices for these plants are as follows:

4-Year Heavy Field Grown—Each	\$1.50
5-Year Heavy Field Grown—Each	\$2.00
100 plants or more \$1.75 each F.O.B. Nursery.	
6-Year Heavy Field Grown—Each	\$2.50
100 plants or more \$2.00 each F.O.B. Nursery	
5 and 6 year old plants should be picked up at nursery as they are too expensive to pack in large quantities.	
3-Year Field Grown—Each	\$1.00
3-Year, in lots of 100 or more—Each	\$.75

"HYBRID ROOT SHOOTS"

Save from 1 to 2 years by planting "Hybrid Root Shoots." These shoots are very easily grown and should make well rooted plants the first year. They are more economical and much more readily grown than ordinary cuttings. Our hybrid root shoots are taken from large berried stock. Plant at least 6 inches deep in rich soil and keep moist. Set shoots about 3 inches apart, preferably in half shade. Sold in bundles of not less than 10.

10 for \$2.00 100 for \$18.00 1,000 for \$160.00

Cutting Wood Whips 14 inches to 20 inches long, 10 whips to the bundle. (Sold only in bundles of 10.) Bundle

\$1.00

"Home Garden" Assortment

Four 5-Year Plants [our selection]

\$5.00

These plants range from 2½ feet to 5 feet in height, and are well set with fruit buds. From 4 to 6 shoots for starting new plants will be given free with this order. Packing and shipping charges about 75c per order.

SHIPPING CHARGES AND SALES TAX

(Washington Customers:
Please add 3% tax to your orders)

No C. O. D. orders accepted.

If more money is sent than is required for packing and shipping charges, balance due you will be made up in extra plants or root shoots.

Approximate packing and shipping charges per plant on 2 year, 3 cents; 3 year, 4 cents; and 15 cents on a 4 year. Heavy 5 to 8 year plants shipped to you, charges collect.

No packing or handling charge if customer comes after plants.

PLANTING INSTRUCTIONS ARE AS FOLLOWS:

Plants should be planted or heeled in upon arrival to prevent drying out. Root crown should be set well below surface of ground in ordinary soil and in wet places less deeply.
